

## Flashlight Baton Instructions

### Batteries

Here is how to insert the batteries into the Baton.

Unscrew the bottom end with the silver pointed glass breaker on it.

There's a black plastic holder that holds 3 AAA batteries. Remove that from the flashlight. It's marked to show how to insert each battery with the end of the battery on the spring.

Put the holder back into the flashlight tube. The holder is marked with an arrow on the side to show which end goes in first.

Re-attach the end of the flashlight.

-----

### To Open the Baton

To extend the baton, hold the top part of the baton in your left hand and grab the bottom part with the glass breaker in your right hand. Make sure you are grabbing the 2 thick rings on the bottom handle.

Turn the top part to the right and the bottom part to the left. Open as far as you want it to open and then twist in the opposite direction, top to the left and bottom part to the right to lock in place. To unlock once again turn the top part to the right and the bottom part to the left push the upper part of the baton back into the bottom part and turn the top part to the left and bottom part to the right to lock in place.
